[1] Fining agents and other minor components have not been listed for these glasses, and thus the sums of the mol% values are slightly less than 100%. The same applies to the composition of Corning's Glass Composition No. 1733 set forth in Table 3 of the November 25th IDS.

[2] The CTE values of Tables 2 and 3 of the November 25th IDS are also for the 0-300°C temperature range.
